

Patient Information Brochure

Your body is unique. Why get a joint replacement that only fits the average knee and is available in a limited number of sizes?

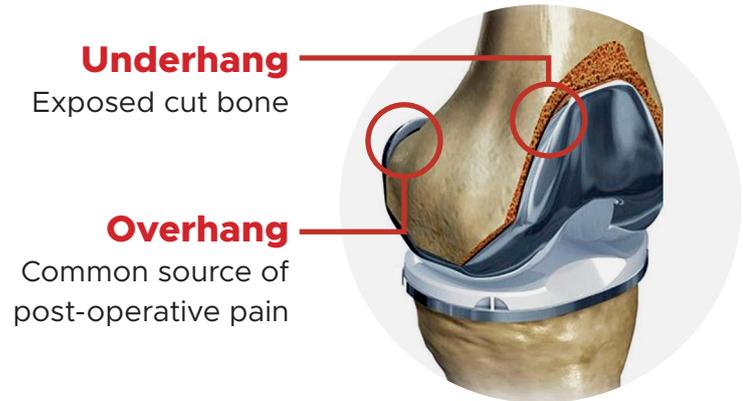

With Conformis, you can receive a fully personalized joint replacement implant that is designed to fit only your specific anatomy.

Introducing Image-To-Implant[®] Platinum Services

We start with a simple idea: Make the joint replacement fit the patient rather than force the patient to fit the joint replacement.

Traditional Knee Implant With Limited Sizes

Underhang

Exposed cut bone

Overhang

Common source of post-operative pain

Mass-produced, symmetric implants can be mismatched with your original, asymmetric native joint

Mismatches between tibial implants and femurs force compromises in implant performance

Mismatches and compromises drive post-operative pain

Conformis Knee Implant

Fully Personalized Implant

Fully personalized for more precise fit –
Designed specifically for YOU!

Individually designed and made specifically for your unique anatomy and natural motion

Surgical plan and design driven by your CT scan data

Clinical evidence strongly supports the performance of fully personalized implants

Conformis offers you the choice to fully personalize your joint replacement implant.

Our knee replacements are designed to match every aspect of your natural knee. The goal of any knee replacement is to be pain-free and restore natural motion, allowing you to return to your everyday activities.

“ My friends say to me, ‘You’re kicking ...[it]...on the court’ and I respond, ‘It’s the precision fit, baby!’ ”

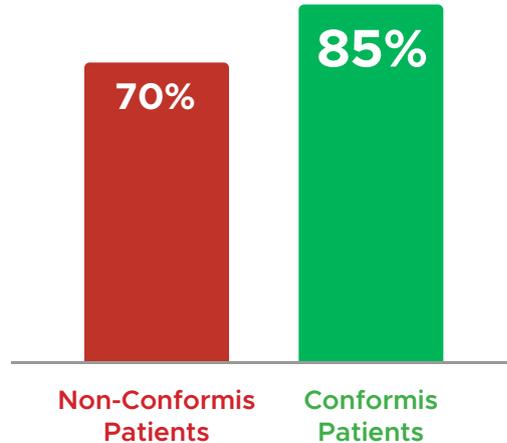

- Satisfied Conformis Patient

It's not just new knees; it's a new lease on life.

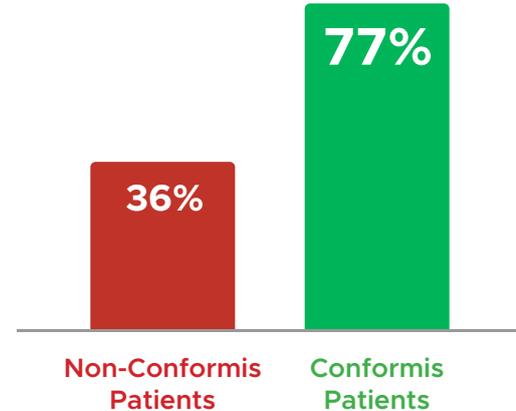

High Post-Surgery Satisfaction Reported¹

How satisfied are you with
your knee post-surgery?

Patients responding 8-10,
where 10 is most satisfied

How likely are you to recommend
your knee replacement to a friend?

Patients responding
"10, extremely likely"

Implants In Use

Surgeon reviews

“ [Conformis] patient specific implants more reliably allow my patients to meet post-operative milestones and return to sporting activities quicker, compared to off-the-shelf implants.”

Robert Tait, M.D.

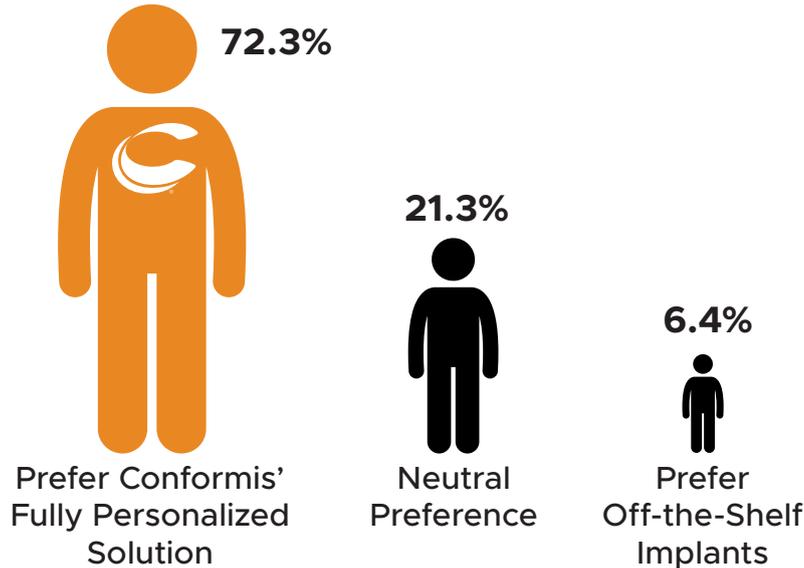

Bryan Huber, M.D.

“I’ve been able to help more people get the end result that they wanted in a shorter time period. Even at 4-6 weeks post-op, patients are typically off pain medication and achieving significant functional and range of motion improvements.”

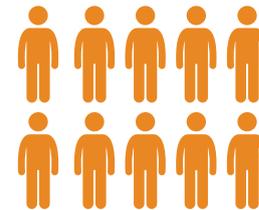

Clinical Validation of Conformis

Assessment by Patients with One Conformis Knee Implant and One Off-the-Shelf Implant

The Journal of Bone & Joint Surgery (JBJS) Reviews published the results of a clinical study in February 2022¹ that compared the self-reported assessments by bilateral knee replacement patients with a different implant in each leg - one personalized Conformis iTotal CR (cruciate-retaining) implant and one off-the-shelf implant.

New clinical study finds bilateral knee patients prefer **Conformis' Fully Personalized Solution** over competitive off-the-shelf implants by a factor of more than **10 to 1**.

Prefer Conformis' Fully Personalized Solution

Prefer Off-the-Shelf Implants

¹ Schroeder, Lennart MD1,a; Dunaway, Andrew DO2; Dunaway, Daniel MD3 A Comparison of Clinical Outcomes and Implant Preference of Patients with Bilateral TKA, JBJS Reviews: February 2022 - Volume 10 - Issue 2 - e20.00182 doi: 10.2106/JBJS.RVW.20.00182

Once you've chosen a surgeon

Step 1

Scheduling Your CT Scan

When you choose Conformis' Image-To-Implant Platinum Services, you will work with your surgeon to schedule a CT scan.

Step 2

CT Scan

The unique size and shape of your anatomy from your CT scan will be used to design and manufacture implants and instruments that will fit you, and only you.

Step 3

Fully Personalized Implant Surgery

After your fully personalized implant surgery, your doctor and physical therapist will work with you to restore your mobility once again.

Out of pocket fees + warranty

Out-of-Pocket Services Fee for Enrollment

Fully personalized implants are available as an upgrade through our Platinum Services program, which includes an incremental, out-of-pocket services fee not covered by your insurance. Your surgeon and/or medical facility can tell you more about the services fee.

HSA & FSA Eligible

The out-of-pocket services fee may be paid using funds from your health savings account (HSA) or flexible spending account (FSA).

CareCredit

For out-of-pocket fees and other healthcare expenses not covered by insurance you may be able to pay over-time with convenient monthly payments using the CareCredit healthcare credit card. CareCredit is a popular payment option that has been used by patients and clients for more than 30 years to get the treatment or procedure they want and need. Visit [carecredit.com](https://www.carecredit.com) for details.

Warranty for Program Services Fee

Your upgrade to a fully personalized implant includes a 5-year limited warranty. Should your doctor determine that you require a revision surgery within 5 years of your knee replacement procedure, Conformis will refund you up to \$3,000 of the total out-of-pocket expense that you paid for Platinum Services.

“ I was really pleased.
I was up and walking much
sooner than I expected.”
