

Patient Information Brochure

You Deserve the Best!

You Are Unique, so You
Deserve a Joint Replacement
Implant that is Designed to Fit
Only Your Anatomy

Select a Personalized Implant

Introducing:

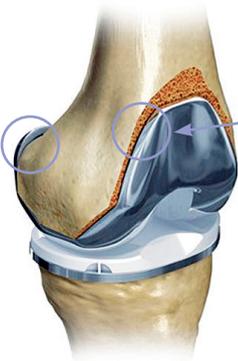

IMAGE-TO-IMPLANT®
PLATINUM SERVICES

Traditional Knee Implant

Overhang

Common source of post-operative pain

Underhang

Exposed cut bone can cause pain

Conformis Knee Implant

Personalized for more precise fit – **designed specifically for YOU!**

Personalized Implant

Conformis offers you the choice to personalize your joint replacement implant. When you choose this service, you will be scheduled for a CT scan. The unique size and shape of your anatomy from the scan will be used to design and manufacture implants and instruments that will fit you, **and only you!**

Out-of-Pocket Services Fee for Enrollment

Selecting the personalization option requires enrollment in the Image-To-Implant® Platinum Services program. To upgrade to a personalized implant, there is an out-of-pocket incremental fee not covered by your insurance.

Your surgeon and/or medical facility can tell you more about the personalization fee.

5-Year Warranty

Your deluxe upgrade to a personalized implant will also include a 5-year warranty¹. In the unlikely event that your surgeon recommends revision surgery within 5 years, and you undergo the procedure, then Conformis will reimburse you up to \$3,000 for your out-of-pocket expenses, which can vary by medical facility.

Sources:

1) Applicability of the warranty is conditioned on the patient's timely execution and submission of warranty acknowledgement and warranty claim forms, both available at upgrademyknee.com.

Why People Choose Personalization

Strong Supporting Clinical Evidence

More than 50 Clinical Studies have been published on Conformis technology, including more than 30 peer-reviewed medical publications that demonstrate the effectiveness of personalized implants.

More than 100,000 Implants in Use

Conformis is the only manufacturer of truly personalized knee and hip joint replacements. There are more than 100,000 people currently enjoying personalized implants.

Conformis Personalized Knee Implants are Designed To/For:

Achieve Superior Fit

Traditional implants are available in limited sizes, this can result in painful overhang and underhang (see images on previous page) of the prosthesis. Conformis implants are designed to fit your unique anatomy.

Provide Improved Range of Motion Over Standard Implants

Studies have shown that Conformis implants result in improved range of motion versus traditional implants – providing more mobility and flexibility.

Less Opportunity for Infection

Conformis leverages customization technology to provide knee and hip replacements and single-use instruments in pre-sterilized kits – that means fewer re-sterilized, reusable instruments are used in your procedure.

High Satisfaction

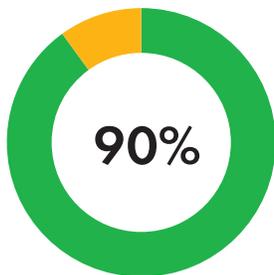

Study: 90% of People are Confident in Using Their New Knee

Research has identified a significant increase in satisfaction among those with a Conformis personalized knee replacement implant versus those with traditional implants.¹ The Conformis implant recipients surveyed were more satisfied, more confident using their new knees, and more likely to recommend their implants.

Study: 90% of People are Satisfied 18-28 Months Post-Surgery

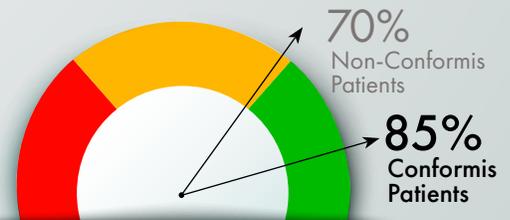

Published clinical research found that those who received Conformis personalized iTotal PS (posterior-stabilized) knee replacement implants, were 90% satisfied or very satisfied 18–28 months post-surgery.²

How satisfied are you with your knee post-surgery?

Individuals responding 8-10, where 10 is most satisfied

How likely are you to recommend your knee replacement to a friend or colleague?

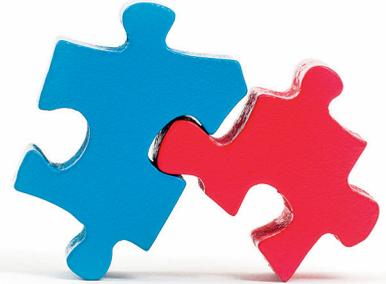

Individuals responding "10, extremely likely"

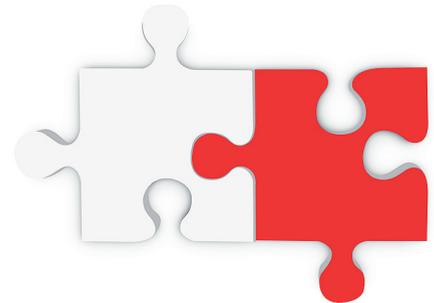

Your Knee

Traditional Joint Replacement – Limited Sizes, Doctors Have to Settle for Closest Fit

Traditional joint replacement procedures focus on the cutting and shaping of your bones to fit off-the-shelf implants, which are made in limited sizes and shapes.

Why settle for traditional when you can have Conformis' leading-edge, personalized implants made to fit your joints' unique size and shape, along with a personalized surgical plan, and personalized, 3D-printed, single-use surgical instruments!

Ask Your Surgeon if Personalization Through the Image-To-Implant® Platinum Services is the Right Option for You

Conformis Personalized Implants: Your Knee

- Your implant, surgical plan, and 3D-printed, single-use surgical instruments will be designed and manufactured individually for you.
- Superior outcomes have been demonstrated in dozens of peer-reviewed clinical studies and multiple satisfaction surveys.
- Requires an incremental out-of-pocket personalization service fee.
